Pacing

The content in this class is sequential; some of the chapters build on previous chapters. Each chapter (other than the orientation which is very short) is roughly the same length. Some learners might find that it is possible to go through each chapter in one sitting, but it is strongly recommended to pace yourself. Plan on about one week to go through each chapter. Do some reading, maybe try a few problems from the review and the assessment, take a day off, and then come back again and chip away at it.

The chapters are:

- Orientation
- Chapter 1 - Numbers
- Chapter 2 - Measuring
- Chapter 3 - Angles
- Chapter 4 - Coordinate Geometry
- Chapter 5 - Euclidean Geometry
- Chapter 6 - Locus and Constructions
- Chapter 7 - Circles
- Chapter 8 - Right Triangle Trigonometry
- Chapter 9 - Blueprints

Enjoy the class!
